The image shows the WordPress editor interface. At the top, there's a toolbar with icons for adding blocks, editing, undo, redo, and a menu. Below the toolbar, the main content area displays a "Sample Page" with a "Post Title" and a horizontal line. On the right side, the "Block" settings panel is open, showing the "Site Logo" settings. The panel includes a "Template" tab, "Styles" (Default and Rounded), and "Settings". The "Settings" section has a slider for "Image width" set to 84, and three toggle options: "Link image to home" (checked), "Open in new tab" (unchecked), and "Use as site icon" (checked). A red arrow points to the "Use as site icon" toggle, with the text "Toggle to change your favicon" next to it. The bottom of the screen shows a breadcrumb trail: Document > Header > Group > Row > Row > Site Logo.
