Name

Area

 **General**

General templates often perform a specific role like displaying post content, and are not tied to any particular area.

 **Header**

The Header template defines a page area that typically contains a title, logo, and main navigation.

 **Footer**

The Footer template defines a page area that typically contains site credits, social links, or any other combination of blocks.

Our Testimonials

How we've earned trust from our clients.

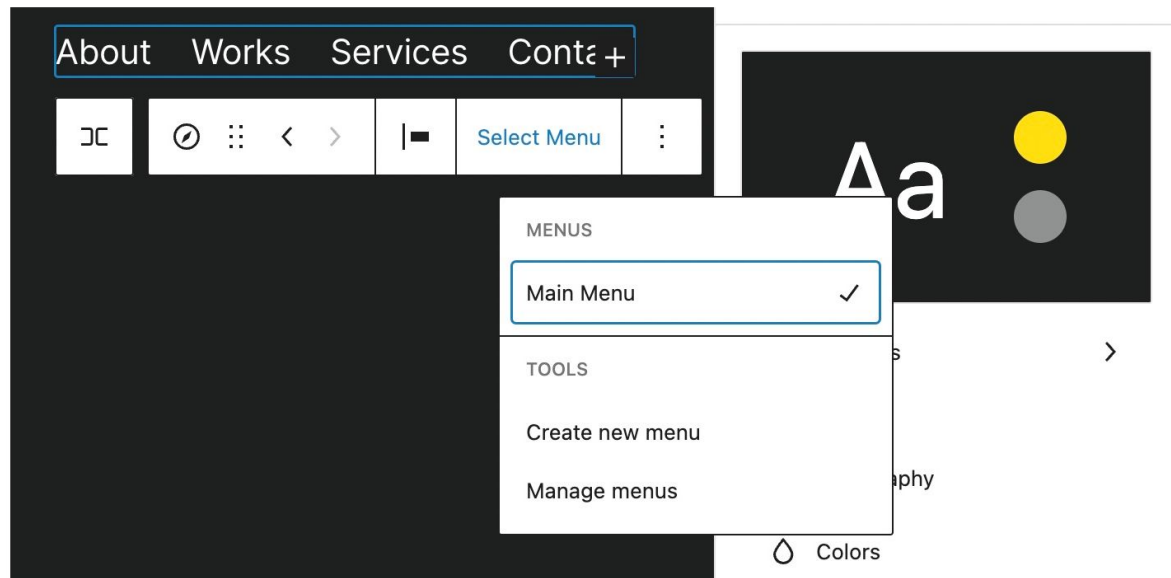

"Working with you challenges me and pushes me to be a better professional. I've learned so much from you and I'm grateful for the opportunity to work with you. I'm looking forward to working with you again in the future." — Smit Rathod

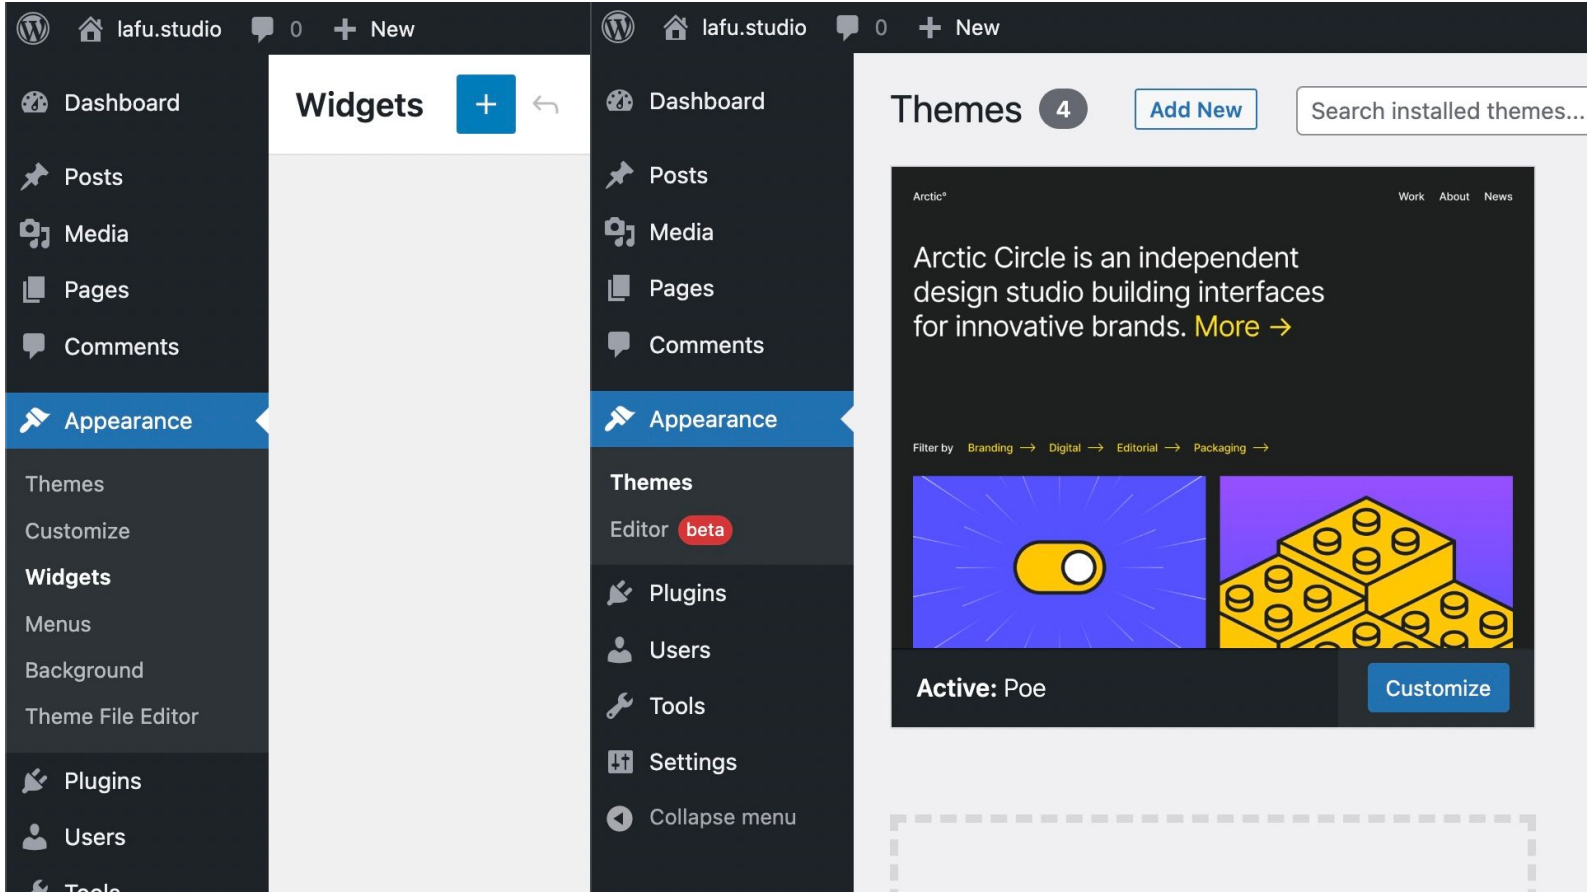

"Working with you challenges me and pushes me to be a better professional. I've learned so much from you and I'm grateful for the opportunity to work with you. I'm looking forward to working with you again in the future." — Smit Rathod

Team layout with with Photo
Praful Patel

 Two screenshots of the WordPress dashboard interface. The left screenshot shows the 'Appearance' menu expanded to the 'Widgets' section. The right screenshot shows the 'Appearance' menu expanded to the 'Themes' section. Both screenshots show the top navigation bar with 'lafu.studio', a home icon, a notification icon with '0', and a '+ New' button. The left screenshot's sidebar menu includes Dashboard, Posts, Media, Pages, Comments, Appearance (highlighted), Themes, Customize, Widgets, Menus, Background, Theme File Editor, Plugins, Users, and Tools. The right screenshot's sidebar menu includes Dashboard, Posts, Media, Pages, Comments, Appearance (highlighted), Themes, Editor (beta), Plugins, Users, Tools, Settings, and Collapse menu. The main content area of the left screenshot is titled 'Widgets' with a '+ Add New' button and a back arrow. The main content area of the right screenshot is titled 'Themes' with a '4' badge, an 'Add New' button, and a search bar for installed themes. A theme preview for 'Arctic' is shown, featuring a dark background with white text and a yellow toggle switch and yellow building blocks. The preview includes a 'Customize' button and a 'Active: Poe' label.

The screenshot displays the WordPress Gutenberg editor interface. At the top left, there is a WordPress logo and a toolbar with icons for adding, editing, undo, redo, and list. The page title is "Sample Page". Below the title, there is a "WordPress site" block containing a coffee cup icon. A toolbar for this block includes icons for copy, delete, left arrow, right arrow, refresh, replace, and a menu icon. The main content area shows a "Post Title" block with a blue horizontal line and a plus sign in the center. Below the title is a large dashed rectangular area. On the right side, the "Block" settings panel is open, showing "Styles" with two options: "Default" (selected) and "Rounded". Under "Settings", there is a slider for "Image width" set to 64. Below that are three toggle switches: "Link image to home" (checked), "Open in new tab" (unchecked), and "Use as site icon" (checked). A red arrow points from the text "Toggle to change your favicon" to the "Use as site icon" toggle. Below the settings panel, there is a "Site Icon" section with a text description and a link to "Site icon settings". At the bottom of the editor, a breadcrumb trail reads: "Document > Header > Group > Row > Row > Site Logo".
